## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-32, 36-63 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dorfel'483, Krockert'986 or Luginsland'129 substantially for the reasons of record.

The amendments and remarks filled by Applicants have been fully considered. The amendments to the claims have been noted. Applicants have mainly argued that the prior art references do not teach the invention as claimed. The claims however, remain unpatentable in view of the new grounds of rejections. In response to the applicants arguments and amendments the examiner submits that the creation of electrostatic forces between particles by friction ( rotating hollow vessel filled with pigment) is a well known scientific fact and is not considered new in the art. Particles will bound and form pseudoparticles when rotated together in hollow vessel. It is believed that the prior art would include such particles.
